

Stratford Software, Inc.

# Electronic Billing Requirements

To bill electronically with the Stratford program you need:

1. a modem
2. a communications software program
3. electronic billing files.

Stratford will supply the 3<sup>rd</sup> item. Depending on what type of hardware you have, Stratford may be able to provide some assistance with the first 2 items. Assistance with the first two items is not included in our support fee and we may charge extra depending on the amount of labor involved. We do have a new transmission program that is able to eliminate the need for a communication program for many of our customers
